

Smarter finance for retail and hospitality businesses

Scale your retail and hospitality business

We help retail and hospitality businesses, from multi-site chains and restaurant groups to independent venues, navigate the demands of a fast-paced environment that requires accuracy and a clear understanding of rapidly changing revenue streams.

Our team of finance professionals and technology specialists focuses on identifying and implementing the most effective software applications specifically designed for your sector to build high-performing financial ecosystems that drive growth, manage cash flow, protect margins, and optimise day-to-day performance.

We do things differently

Unlike other VARs, advisors and consultants, we're not tied to any software companies. So, our focus is only ever on helping you identify which financial solutions are right for your retail and hospitality business and there's no obligation to buy.

We take away the overwhelm

Choosing software to manage high daily transaction volumes, complex staff rotas, and multi-site inventory can be daunting.

We simplify the process, giving you clarity and confidence at every stage while helping you avoid costly mistakes and implementation risks that can lead to operational bottlenecks and expensive downtime.

Make an informed decision

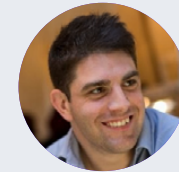

Our independent expertise provides you with everything you need to:

- Identify the ultimate financial and operational ecosystem for your stores or venues
- Confidently present a modernised tech strategy to your board or investors
- Seamlessly deploy new systems with minimal disruption to your daily trade
- Safeguard customer and financial data
- Ensure total compliance with the latest industry regulations

You'll receive practical, transparent guidance—without unnecessary technical jargon.

You need software that's designed to help your business grow but that doesn't come with costly features you'll never use.

Jamie Allen, CEO, 4PointZero

Your venues, staff, inventory, and data in one place

It is time to bring your finances, people, customers, and operations into one powerful, integrated ecosystem designed for retail and hospitality businesses. By connecting every part of your business, from front of house to back office, you gain the financial clarity needed to improve efficiency, respond quickly to demand, and stay in control of performance.

Optimise your greatest asset: Your people

Staffing is one of your largest expenses. Gain total visibility over labour costs with intelligent rota and workforce management integrations. Match your staffing levels to real-time footfall and sales forecasts, balancing labour budgets while ensuring excellent service across every location.

Lead with real-time intelligence

Access real-time reports in a clear, visual format on any device, giving you full visibility of your financial position. From daily sales performance and product or menu margins to inventory turnover and key KPIs. Easily filter data by location, department, or product line, so you can make faster, smarter, data-driven decisions.

Automate daily transactions

Take control of high-volume transactions with powerful automation tools that eliminate manual processes, reduce costly errors, and keep your finances running smoothly every day. From fully automated sales and reconciliation to streamlined payment runs and BACS, you'll gain greater control over outgoing payments while improving back-office efficiency, freeing up valuable time to focus on running your business.

Inventory management

Stay on top of your stock with real-time tracking and automated updates across multiple sites. Gain full visibility of stock levels to reduce waste, avoid shortages, and make informed purchasing decisions using accurate, up-to-date data.

Multi-site control

Manage multiple locations with ease through a single, integrated system that connects your entire operation. Standardise processes across sites, ensure consistency in reporting, and compare performance in real time. With complete visibility from head office, you can maintain control, drive efficiency, and make informed decisions across every location.

Connect your entire tech stack

Modern hospitality and retail ecosystems thrive on connectivity. Seamlessly integrate your accounting software with your POS, e-commerce platforms, property management systems (PMS), and HR tools. This unified approach gives you unprecedented visibility, control, and efficiency from the warehouse to the front of house.

With the right system in place, you can:

Accurately manage project costing and billing

Track and allocate expenses with ease

Optimise resource planning and utilisation

Access real-time dashboards and financial reports

Support remote teams with live project updates, anywhere

Get quantifiable results

On average, we see a payback period of under 1 year and ROI of over 250% over 5 years. Our customers report:

- Lower audit fees and compliance costs
- Optimised resources
- No more hardware maintenance costs
- Empowered growth

**ROI of
over 250%**
over 5 years

The 4pointZero team migrated our financial data from our older desktop accounting system to a new cloud-based accountancy system. They listened to what we needed and implemented systems that have automated many of our processes and reduced manual data entry. They are always on hand for any queries we have regarding the system and are happy to provide recommendations on other business processes that have proven to be invaluable.

Magdalena Turczyn, Finance Director, Café Fortune

Our proven approach

We understand that every retail and hospitality business is different. So, while our methodology process stays the same, the advice we give will always be unique to you and your business structure, strategy and objectives.

Step 1: Audit

We'll work with you to understand the challenges you face and what you want to achieve with your business.

We'll audit your existing systems and processes and identify any redundancies, inefficiencies or areas for improvement.

Step 2: Summary of Findings

We save you time with a tailored Summary of Findings, delivering clear, honest, jargon-free advice. It outlines recommended solutions and their business impact, giving senior decision-makers an at-a-glance view of the best financial ecosystem for your organisation.

Step 3: Implementation

We handle the details so you can enjoy the results. We'll configure and integrate all your systems and apps, and migrate your historical data, so you can start to combine your real-time financial data with your operational insights.

Step 4: Training

To ensure you hit the ground running and get the most out of your new system, we run a range of personalised workshops. All training sessions are run by a dedicated systems accountant, specialising in your chosen solution and systems.

Step 5: Ongoing Support

We provide ongoing systems support at the level right for you, so you can focus on running your business and driving growth.

We've grown rapidly over the last few years and needed a finance system that could grow with us. 4PointZero implement tools that support our daily operations and gave us the ability to plan for future expansion with confidence. Their knowledge of both Domino's and multi-site hospitality made a huge difference.

Dilip Sodha, Director, Sodha Group

Future-proof your business

With the right financial ecosystem in place, you can get the real-time financial data and operational insights you need—with timely reporting and greater visibility of your data and metrics.

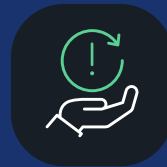

Save time, remove inefficiencies, and focus on your business growth. All with our data security and ongoing support:

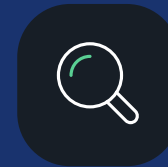

Get the financial reports you need—fast

Save time with system and process automations

Stay up-to-date with ongoing systems and software support

Free your finance teams from data-inputting to focus on interrogating your operational data

Focus on growing your business

“Working with 4PointZero to migrate our accounts into a cloud-based system felt like being in safe hands, and the ongoing support provided to us has been invaluable in promoting the success of our Digital Consultancy offering to clients”.

Johnathan Mullane, CEO, Retail Financial Solutions

Why work with 4PointZero?

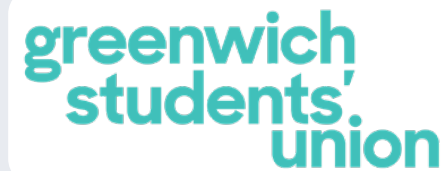

While we have great relationships with the different software providers, we're wholly independent and impartial, which means our focus is 100% on finding the right financial ecosystem for your business.

We add value by sharing our systems knowledge and experience, providing expert implementations, and maintaining your systems with ongoing support as and when you need it.

- We explain the benefits, features, and considerations of each system in relation to your existing operations software
- We identify the best financial ecosystem to meet your business needs
- We tailor the right team of our people to manage your project, according to your system of choice
- We take care of the entire implementation process from start to finish and beyond
- We streamline your cloud-based systems to provide you with a complete and succinct audit trail

Our clients

We work with more than 1,000 clients to revolutionise the way they run their businesses.
